Chiropractic care is an essential part of our families health. My husband and I have been going to a chiropractor for years and firmly believe that proper spinal alignment is a big key to maintaining a strong and healthy body. When the body is in proper position it functions as God intended it to and is able to resist sickness. Our family hardly ever goes to a medical doctor for anything but a broken bone but we do maintain our bodies with regular adjustments and massage.

We are the proud parents of 2 children: Dawson age 9 and Madison age 6. They also receive regular adjustments and even a message once in a while. They look forward to getting their adjustment and hearing the popcorn pop as their spine is put into proper position. My son was born with Hemihypertrophy (half of his body is larger than the other half). This is all the more reason for us to maintain regular adjustments. With one of his legs larger than the other the hips and spine can easily lock up and not have the proper movement they should.

Dr. Asay and Dr. Heward at Advanced Back and Neck Care in Ocotillo take great care of our family. That is the best chiropractic office we have ever been to. They not only take care of the spine but help strengthen the body and alleviate any pain we may be experiencing. I could give up many things in life but would never stop giving my family the proper spinal care that is necessary for a strong healthy life. Thank you Advanced Back and Neck Care for your caring, professional service, and support of our family.

Andrea and Frank Francis

Unsure of your insurance benefits? We'll check your benefits for you.
